

G-1

Assembly Instructions

Step 1: Body

- Bend the tabs on pieces 2, 3, 4, and 5
- Glue the body pieces together. Don't get glue on the tabs on pieces 2, 3, 4, and 5. Let dry.

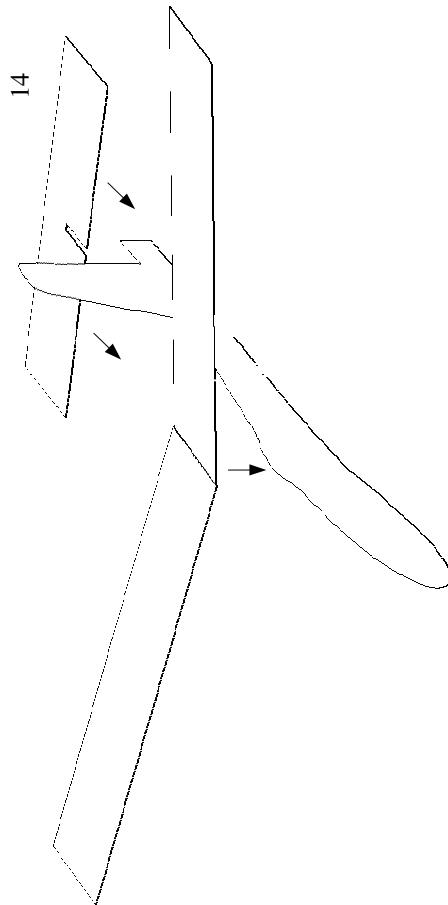

Pieces are marked with these lines:

- Cut along line
- - - Fold towards printed side
- · - · - Fold away from printed side

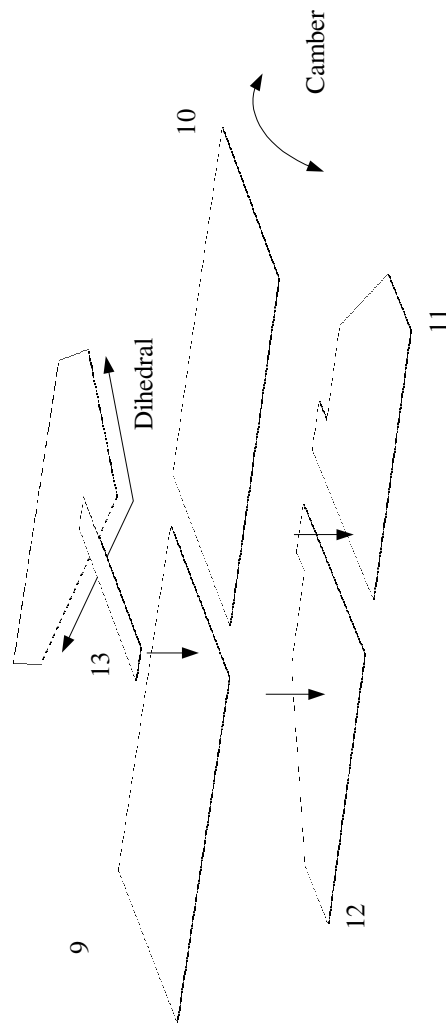

Step 3: Final Assembly

- Attach 14 to body using tabs from 2 & 3. Let dry.
- Attach wings to body using tabs from 4 & 5. Let dry.

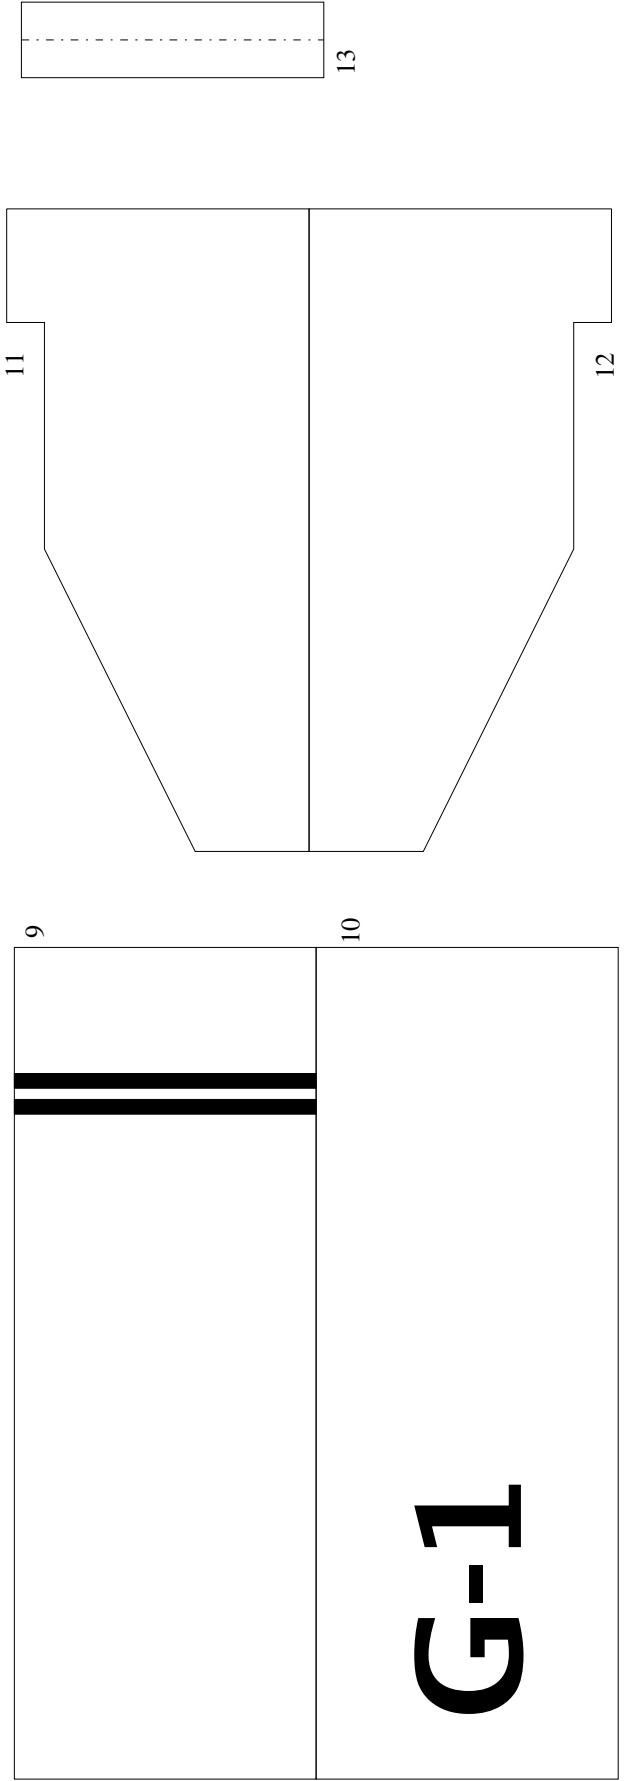

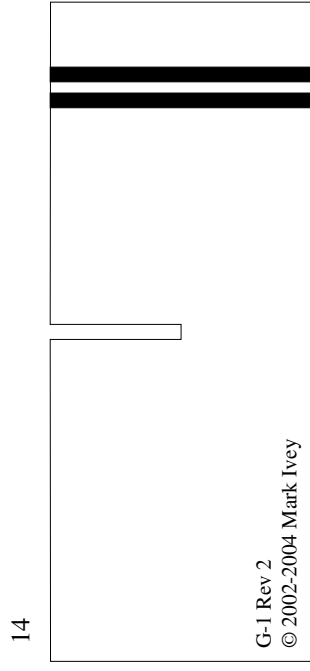

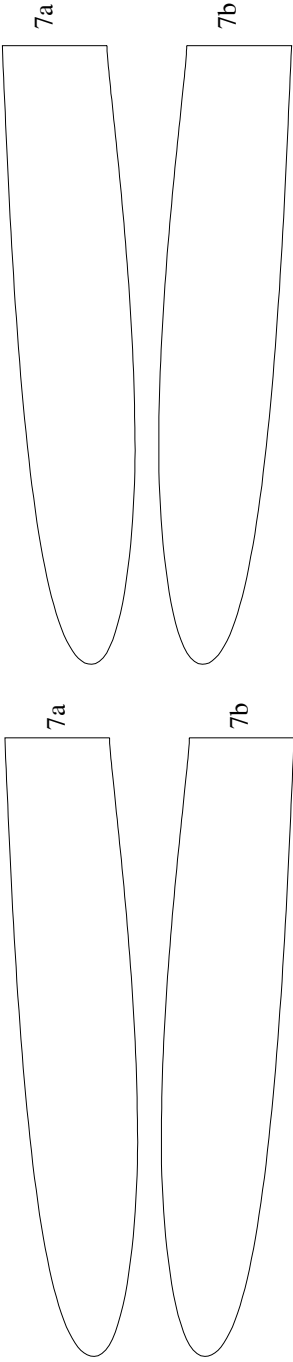

Step 2: Wings

- Assemble both wings by gluing 12 to 9 and 11 to 10. Let dry.
- Once they are dry, carefully bend wings to give them camber.
- Bend piece 13 to give it camber. Bend again along the line. This shape will be easier to maintain when the piece is wet from glue.
- Attach wings to each other using 13. Use the dihedral gauge to get the right amount of dihedral angle. Let dry.
